HULFT EMPOWERS DATA-DRIVEN TRANSFORMATION OF THE PAYER BUSINESS MODEL

Data is a central part of the changing payer business model. HULFT understands the payer business processes, providing a proven data logistics platform for integration, process automation, data governance, and more.

HULFT PREPARES YOU FOR YOUR JOURNEY IN VALUE-BASED CARE

Cloud adoption

HULFT supports your hybrid cloud framework, connecting to all your data sources such as AWS, Microsoft Azure, Salesforce, and more.

We provide the support infrastructure for immediate provisioning in the cloud, including mapping to Active Directory and enabling role-based access controls.

Payer-Provider collaboration

HULFT enables digitized processes and automation of authorizations that require medical review within existing workflows.

HULFT supports NCQA proposed option for Clinical Quality Measures by incorporating clinical data with claims data.

Regulatory compliance and submission

HULFT supports MOAs in the accurate, complete, timely submission and reconciliation of RAPS and EDPS.

Reduce costs and improve operational efficiency

HULFT creates value by building a purpose-built environment for analytics, and consumable layers for analytical purposes, as payers look for new and strengthened capabilities to engage members, optimize risk adjustment and quality, enhance provider and network efficiency, prevent fraud waste and abuse, and contain costs.

Population health management

HULFT strengthens payers' care-coordination and disease management initiatives to target members through rules and models that provide high sensitivity and specificity. We enable provider networks to deliver care when it is most effective in producing the best outcomes, with a focus on modifying risk.

HULFT provides a comprehensive data logistics platform

Automate
Eliminate time consuming IT grunt work, coding, and human errors

Orchestrate
Secure, centralized visibility and management for your data workflows

Accelerate
Securely move your information at scale

About HULFT

A division of Saison Information Systems (TYO: 9640), HULFT has helped more than 10,000 global customers automate, orchestrate, and accelerate the secure flow of information at scale. HULFT provides a single global platform that helps IT quickly find, secure, organize, transform, and move the right information – automating the entire business process of data flow, and unlocking value in a sea of information. With 25 years of customer experience, HULFT is the engine that makes data work.
